We have a very strong HR division directed by Advocate Mr. Kunjipalu.

Around 500 sincere, hardworking and enthusiastic staffs are working in all the Goodwin branches and they are very co-operative with the Goodwin management.

Our main feature is that we deal in high quality products. Our advertising wings are very effective and systematic. We are doing the final roundup of our advertising section and may complete in just few days. We are doing very vast and high qualities ads through Television and Newspaper etc. We are providing Insurance coverage from National Insurance Corporation of India, One year replacement guarantee and life long services for our customers.

Goodwin Security System India

Goodwin Security System:

Goodwin Group has introduced first time in India, the imported IT devices which can be operated through GSM+GPS technologies namely Goodwin Security systems, which was inaugurated by the Honorable Industrial Minister Sri Elamaram Karim. State Vyapari Vyavasayi Samiti Patron, Sri E.P Jayarajan launched the product at Joys Palace, Thrissur on 14th June 2009. There were many famous persons who participated in the function like the Honorable Mayor of Thrissur Prof. R Bindhu, President of Kerala State Vyapari Vyavasayi Samiti Sri Binny Immatty, Dy General Manager of BSNL (FA/TR) Sri.P.R.Ramachandran, Opposition Leader of Thrissur Corporation Sri I.P.Paul, Emmanuel Group M.D Sri T.O Byju and our special guests were Mr.Winson and Mrs. Lilly Gao from Hong Kong and many respected Business Tycoons and Representatives of authorized leading car dealers etc.

GOODWIN SECURITY SYSTEMS are successfully running a venture in Kerala, which supplies the imported security devices that are useful for Homes, Cars, Commercials etc. These items are imported from Hong Kong, Thailand, China etc. by the Japan and German technology.

Goodwin Security Systems are marketing different types of security devices like Home Security Devices, Car Security Devices, CCTV Cameras and Pen Cameras. Our Car security devices are available at all leading authorized car dealers in Kerala. These security devices are controlled by mobile phone all over the world and we are co-operated with BSNL in India.

Our Products: The main products of Goodwin Security Systems are as follows:

- 1. 3G Security Products:** The V900 3G GSM camera is the future of security, giving instant text and picture to your mobile phone from anywhere in the world. The superb multi-alarm camera integrates both GSM and 3G Wireless technology at a fraction of the price of conventional CCTV system.
- 2. CCTV:** This system is made by a scientific method to see live in our television or computer for our day to day activities in a house or premises. We can record these things in our computer with 15 or 30 days backup. The importance of having a professionally designed specification can be seen from the fact that when the police seek to use CCTV evidences in court it is found to be inadmissible in at least 705 of cases. While it is true that almost anyone can look at a location and suggest a number of cameras, only those who have experience in this field, through an understanding of the principles of optical science, will generally be able to recommend a camera that will give the customer a picture with the best definition or coverage. Often it is also possible to give clients "added value" by locating cameras, and utilizing lenses which are able, not only to view the area of concern, but also give peripheral vision of other points of interest.
- 3. GSM Home Security System:** By this systems we can protect our house, office and business concerns from anywhere in the world. This is a GSM Security Device operated by mobile phone. Anyone who entered without permission in the locked houses or premises we will get information by a call in our mobile phone and the other pairing mobile numbers. If we attend the call we can hear sounds inside the house or premises. This is a wireless security system. The main features of GSM Home Security System are as follows.
 - GSM Frequency worldwide transferable
 - Wireless, easy and shortcut installation
 - Main unit can be hided in any secret place
 - Code learning RF remote controls
 - Full voice menu, easy to operate
 - Users can monitor the home status by phone at any time
 - 8 alarm zones w/LED indications
 - 3 alarm phone and 3 emergency phone numbers can be set
 - Backup battery can supply power for twelve hours
 - Emergency help on remote
 - Different zone can have different voice indication so that the user identifies which zone is alarming.

4. Car Security System:

- **GSM Car Security System:** By this system we can control and protect our vehicle through mobile phone from anywhere in the world. If there is any theft or attack on our vehicle, we will receive the information by a call in our mobile phone and the other pairing mobile numbers. We get more facility like, Engine start and off, A/c on and off, Centre locking and unlocking, monitor to talk; engines cut off and locate the position of vehicle while the vehicle is stolen.
- **GSM + GPS Car Security System:** Besides the other car security system facility, we can speak to others who travel inside the vehicle. We can locate the correct position of our vehicle by the method of global positioning system (GPS).
- **Remote Car Security System:** These types of security systems are functioned by remote control. We can operate our vehicle like, Engine start and off, A/C on and off, Centre locking and unlocking, Engine cut off while the vehicle is stolen, Two way response like mobile, Reservation Starting to avoid the battery charge down, Car battery voltage measuring, Check the temperature inside the car, Microwave Sensing, in one kilometer range by this remote system. Also anybody who open the door or attack the vehicle without our permission, the product will inform by an alert through the remote. We can also open the Dick without the keys (Optional).

Benefits of the products:

- One year replacement guarantee. After one year life long service.
- 4 Lakh insurance coverage for the customer and family.

Documents to be collected from the customer for new sim card

- Two passport size photo.
- ID and address proof of the customer.

5. PEN CAMERA: The smallest camera in the world. This camera has 4GB memory card with 7 hours video and audio backup. We can record video very easily and confidentially by this type of camera.
